S.C. COUNTY AND MUNICIPAL EXPENDITURES AND REVENUES

FOR THE FISCAL YEAR ENDING JUNE 30, 1982

The tables that follow describe the sources of revenues and types of expenditures made for municipal and county governments in South Carolina during the period July 1, 1981 to June 30, 1982. The data were provided by municipal and county officials and collected by the S.C. Division of Research and Statistics. The Office of General Revenue Sharing, U.S. Department of the Treasury requests these data. They are verified by the Census Bureau, U.S. Department of Commerce and the data were processed and analyzed by Clemson University staff.

The data on revenues and expenditures are reported in considerable detail by the counties and municipalities.* For purposes of this report, these data have been aggregated into 12 revenue categories and 18 expenditure categories. Expenditures and revenues are reported in total dollars, dollars per person in the jurisdiction (per capita), shares of each category of expenditures (revenues) of total expenditures (revenues).

The data reported were assigned to individual spending and revenue categories by officials of each political subdivision. Because accounting procedures may vary between cities and counties, intercity or inter-county comparison of expenditures for certain services or revenues by type may be misleading. For example, some cities may separately account for sewer and water services while others may consider them jointly in

*One county and 12 municipalities had not provided their data at the time this report was printed.

their accounting process. The level or quality of services may also vary between jurisdictions. For example, some county hospitals may provide a wide range of specialized surgical and analytical services while others provide only basic services.

The results are sorted for each Council of Government (COG) region in South Carolina so that counties and municipalities within a COG region are grouped together. The descriptive results are for the general information of interested parties. Individual expenditure (revenue) categories may vary considerably between local jurisdictions for many reasons. There is no attempt in this report to explain these variations. It is the hope of the Clemson staff that these data will be helpful to local officials as they pursue ways to provide effective and efficient government services.

Requests for more detailed data, analysis and explanations of the tables provided are welcomed by the Clemson staff. This data source will be updated annually and future reports presenting data and analysis will be forthcoming.

REVENUES*
